Houstoun Hall-f2f (student)

Ben Bradley- f2f (student) Michael Serwitz- f2f (student) RussellTeasley- f2f Kim Vickers- f2f Paul Wertz- f2f Mary Gowan- f2f Phil Nierodzik- f2f Mary Anne Enriquez f2f Joanne Taylor f2f (mayor of Dahlonega) Rob Cherveny f2f StevenAnderson- f2f (TeamLogiđ)

## <u>Notes</u>

Qtlry basis for meetings with the advisory board

Metric for measuring success? Personnel hired into industry in cyber field, certifications, internships, co op (traditional or nontraditional)

Donna Gallaher soft skills development is important (presentatiskills, communications, and businesskills around ROI and risk prioritization)

Consult with software companies maybe in the sandbox environment create a consulting opportunity for the university

Mike Ellerhorst Has UNG explored intentional/specific outreach to people with differing abilities (e.g. physical disabilities, intellectual disabilities, people on the autism spectrum)? I believe careers in Cybersecurity are very achievable for people of all ability levels and interested in your perspectives.

Peter Cresse collaborative with general principles, students sometimes felt they werdendet the as good as other programs, how is UNG being flexible

Jim Crupi letting companies share real world issues in the classrooms

Shannon Whiting flexibility, are we doing data analysis to focusing the program? Are we covering the vulnerabilities of cyber? Broadening faculty with different cyber skills. What do students see as something that they did notee at UNG? UNG covers red team of cyber but maybe not the blue team side (no real specialty in it).

Touching base in a year to see how are we doing.

If you need this
